

Elaheh (Ella) Rasoulia

Atlanta, GA • 1-470-356-1965 • elaheh.rasoulia@gmail.com • [LinkedIn](#) • [Website](#)

Product Manager with 4+ years of experience building data-driven and AI-powered products. Recently completed an M.Sc. in Analytics at Georgia Tech with hands-on experience in ML and LLMs. Seeking full-time AI/ML Product roles starting Mar 2026.

EXPERIENCE

Rogers Communications Inc.

Toronto, Canada

Product Manager

Sep 2022 – May 2024

- Owned growth and retention strategy for a \$24M Microsoft 365 portfolio across SOHO, SMB, and Enterprise channels by researching customer pain points and reprioritizing high-impact features, driving improved product adoption and projected revenue expansion, resulting in \$760K MRR uplift
- Improved churn prediction accuracy by 45% by partnering with data science to design, validate, and deploy Machine Learning models that informed retention targeting and roadmap prioritization
- Reduced customer turnover by 10% by building automated Power BI and SQL-based P&L dashboards that improved visibility into SKU performance, license growth, and churn drivers for leadership decision-making

STICKERYOU

Toronto, Canada

Product Manager

Aug 2020 – Aug 2022

- Drove \$730K in ARR (+6% over target) by leading the end-to-end launch of three new products, aligning design and engineering teams, and enabling sales through data storytelling, product documentation, and training
- Increased roadmap execution efficiency by prioritizing features using customer feedback, market analysis, and cost/revenue impact modeling, accelerating delivery of high-impact initiatives
- Produced \$35K in incremental monthly revenue by optimizing checkout flow, upsell, and cross-sell features through A/B testing, user behavior analysis, and rapid experimentation

EDUCATION

GEORGIA INSTITUTE OF TECHNOLOGY

Atlanta, GA

M.Sc. in Analytics – Computational Data Analytics (STEM-designated) – GPA: 4.0/4.0

Dec 2025

SCHULICH SCHOOL OF BUSINESS, YORK UNIVERSITY – Master of Management (Member of Dean's Honor List)

Aug 2019

SHARIF UNIVERSITY OF TECHNOLOGY – B.Sc. in Industrial Engineering

May 2017

PROJECTS

Repository Level Code Generation with LLMs

Sep 2025 – Dec 2025

- Generated code patches for 20+ repositories, comparing LLM performance on real-world software engineering tasks
- Evaluated 4+ LLM model configurations (Gemini, DeepSeek) on repository-level code generation, achieving up to 0.96 weighted average similarity scores and analyzing performance across baseline and documenter-augmented approaches
- Implemented multi-metric evaluation pipeline combining similarity analysis (line, sequence, file overlap), LLM-as-a-judge assessment, and unit test validation to assess patch quality and correctness

Expert-Aware Knowledge-Guided Decoding

Sep 2025 – Dec 2025

- Developed a Knowledge-Guided Decoding (KGD) framework that adjusts token logits during inference to ground model outputs in retrieved knowledge, improving factual accuracy and reducing hallucinations by 9.2% vs. baseline
- Implemented the framework with OLMoE and DeepSeek-MoE, evaluated on Natural Questions benchmark
- Designed ablation studies and evaluation pipelines to analyze the effects of embedding fusion, alignment rewards, and retrieval-decoding contributions on semantic robustness and token-level guidance

Uplift Modeling for Blood Donor Engagement

May 2025 – Aug 2025

- Built an XGBoost uplift model on 70M+ records to prioritize donor outreach (focus on O⁺/O⁻), enabling smarter engagement strategies and improving outreach efficiency with 0.87 AUC
- Applied SHAP for feature explainability and conducted break-even & decile analysis to quantify business impact

SKILLS & CERTIFICATIONS

Certifications: Google Gen AI Intensive Course, Microsoft Azure AI certified

Programming & Database: Python, R, SQL | **AI Frameworks:** scikit-learn, PyTorch, Hugging Face Transformers, LangChain
